

S.T.E.P. has not, despite the article in the Advocate-Courier, conceded defeat. The threatened ridge-top bushland is most precious to us and to all future residents of this area, and we will continue to battle until it is incorporated into what the National Trust of Australia recommends - a single Lane Cove Regional Park. With them we believe that this area, because it is free from invasion by exotic plants, should be retained as natural bushland.

WESTBROOK ROAD TIP

We were most disappointed to find that this site (which, incidentally we acquired from the Lands Department for the Council) was considered unsuitable for the full compliment of sealed netball courts - the Council Engineer said that only eight could be safely sealed at present. It appears that Council is determined that the Netball Association will have every demand they care to make, met, and because they want them all sealed, they will get them that way, and immediately. What a pity Council cannot lend such a receptive ear to other residents.

SUPPORT

We have been fortunate in gaining the support of various bodies through letter, ideas etc. Those who have notified Council of their protest at this useless destruction include:

- The National Trust of Australia
- The National Parks Association of N.S.W.
- The Nature Conservation Council
- Milo Dunphy - Total Environment Centre
- Environmentalists for Full Employment Ecology Action
- Dr. Myerscough - Sen. Lecturer in Biology, Sydney Uni.
- Prof. Talbot; Dr. S. Wright; Dept. Environmental Studies, Macquarie Uni.
- Dr. Don Adamson - Biological Sciences, Macquarie Uni.
- N.S.W. Field Ornithologists Club
- Orienteering Association of N.S.W.

Other individuals and groups from many areas have protested, but unfortunately Council have enormous powers, and ours appears impervious to appeals from the far-sighted.

LETTERS

We collected almost 300 letters in the area adjacent to Canoon Road - over 80% of these were in favour of protecting our bushland. Our Ward Aldermen - Lee and Lennon - at Council's meeting on 22.5.78 made no attempt to bring these to Council's attention. What price power?
